

Marine Animals (English – Fact File)

KS1

There are so many interesting, amazing, and sometimes unusual, animals living in our oceans, from the tiny seahorse to the enormous whale. Choose an animal that lives in the sea to find out more about and write your findings in a non-chronological report (a fact file). There are lots of animals to choose from, such as dolphins, whales, turtles, sharks, seals, walrus, octopus and many more!

EDUCATIONAL RESOURCE

- Include information about what they eat, where they live and any interesting facts you discover.
- Remember to use a title, write an introduction and put your information into sections with a sub-heading.
- You may want to draw a picture of your chosen animal to show the reader what they look like.

After finishing your non-chronological report, why not read it to someone in your class and share all about your animal!
